How to Share a Power Point Presentation for viewing

In order to access the online Microsoft 365 apps you must first go to the YSU penguin portal at this link <u>https://ysu.edu/penguin-portal</u>, and then select "Office 365".

You may be asked to enter your YSU email and password before you gain access to Microsoft 365 online apps. You will then be guided to the Outlook email app. To access the Power Point app you must select the square icon in the upper left hand corner.

A new blank Power Point presentation will appear where you can create your own work. Editing, design and formatting tools are located across the top of the page (add/edit/remove slides, change the theme of the presentation, insert textboxes/images/shapes, etc.)

To share your presentation with students and others, click on the "Share" button located in the upper right hand corner of the page.

Once you click the "Share" button, a new window will appear. In this window you can select which groups can view your presentation. It will default to the most common choice of "People in YSU with the link can view" meaning in order to view the presentation a person will need the link and a YSU Outlook account.

You can also allow the people you share your presentation with, to edit your presentation, you do this by checking the box that says "Allow Editing". Once you make your selections remember to click the blue "Apply" button towards the bottom of the window.

Then you can enter the email addresses of your students or others whom you want to share your presentation with. (**Note:** as you enter email addresses your YSU Outlook email address book should be linked, making finding emails easier to find).

You can also click the "Copy Link" button, which copies a link that takes others straight to your presentation when they click on it. This may be a helpful option if you wish to share the presentation on Blackboard or other platforms. When you finish making your selections, remember to click the blue "Send" button.

You will know you successfully shared your presentation when a new window pops up after clicking the "Send" button. The window will contain a green checkmark in it.
